November 1, 1999

Reference: Lord-Shope RA Monthly Progress Report

Dear Mr. Turner:

Lord is hereby submitting five copies of the monthly progress report for the period of October 1, through November 1, 1999.

The following work was conducted during this period:

REMEDIAL ACTION

The thermal oxidizer unit has been operating satisfactorily during this interim. Influent concentrations were 257 ppm. The overall efficiency of the unit remained good at 99.9%.

The groundwater treatment unit operation was normal during this interim. Total VOC removal efficiency was 99%. A copy of the NPDES report for September will be submitted under separate cover.

Comments were received from USEPA on the Long Term Monitoring Report and Intrinsic Remediation Report this month. Lord and our consultant, Eckenfelder Brown & Caldwell are reviewing the comments and will respond in the near future.

Mr. Turner of USEPA and Mr. Kimball of PADEP visited the site on October 20 and 21. The purpose of the visit was to observe the sampling event and to perform a required five-year review of operations.

Sincerely,

LORD CORPORATION,

Eugene A. Miller
Manager, Environmental Services
